

Powered value

KPMG Powered Enterprise Finance enabled by SAP

Outcome-driven functional transformation

Bringing you the future of digital finance

Finance functions held back by outdated and disparate technology, processes, and service models struggle to achieve their strategic objectives. Yet, with the right approach, businesses can transform and drive greater value. Powered Finance enabled by SAP offers you a direct route to finance transformation, helping to solve for common pain points businesses face today:

- How can the business reach a future-ready Finance function that delivers more value?
- How do Finance, Human Resources, Operations, and other support functions align to each other?
- How is the business continuing to enhance the Finance function with digital technologies and enablers?
- How can you structure and encourage staff to embrace a digital workforce?
- How does the business prioritize the most important initiatives and cross-functional dependencies required to drive finance transformation?
- What are the disruptors or external market influences that are most challenging to the Finance function or business?

Powered Finance includes the KPMG Target Operating Model (TOM), Powered Technology and Powered Evolution which drive your finance function to be more responsive, resilient, and competitive, ultimately bringing you the future of digital finance—today.

“ Powered Finance enables us to see the future, relate it to what we have today, and move forward with leading practice.”

— Multinational healthcare client

Components of Powered Finance

KPMG Target Operating Model

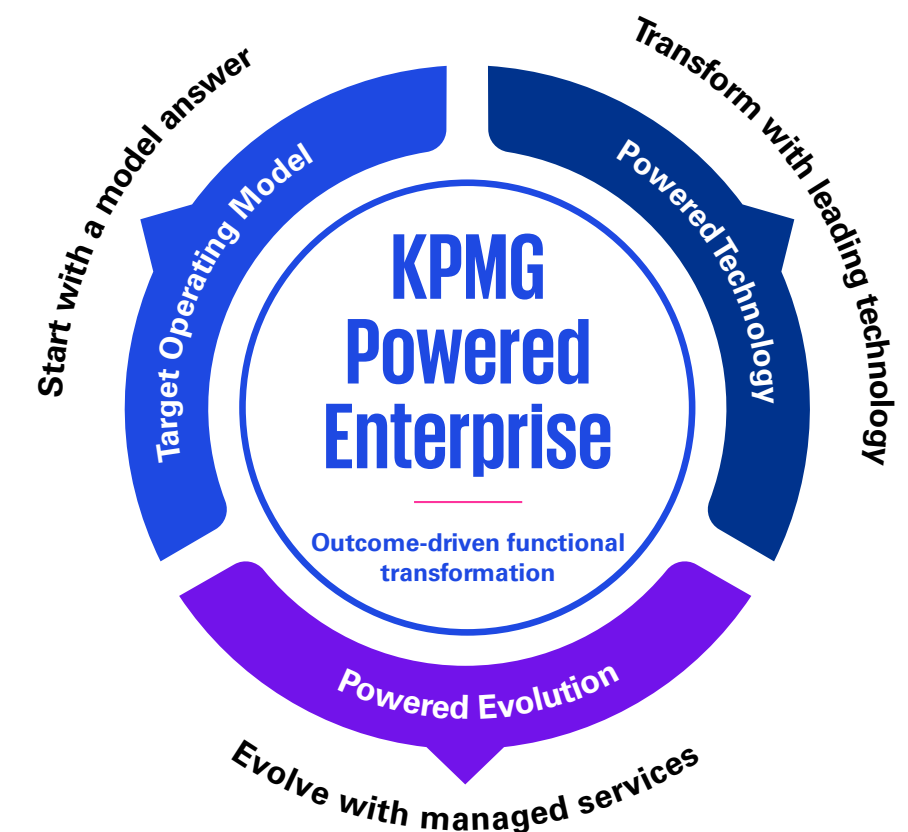

A holistic design of how your business works. It includes six design layers and codifies our knowledge of functional and industry leading practice.

KPMG Powered Technology

Leading SaaS platforms preconfigured to reflect leading practice are enhanced with prebuilt digital assets that incorporate artificial intelligence and advanced automation.

KPMG Powered Enterprise Evolution

Managed services help drive continuous improvement and realize the full value from the latest leading practices and technology innovations.

A model answer to achieve the results that matter

The KPMG Target Operating Model (TOM) aims to deliver sustainable finance transformation. It includes six design layers:

Governance

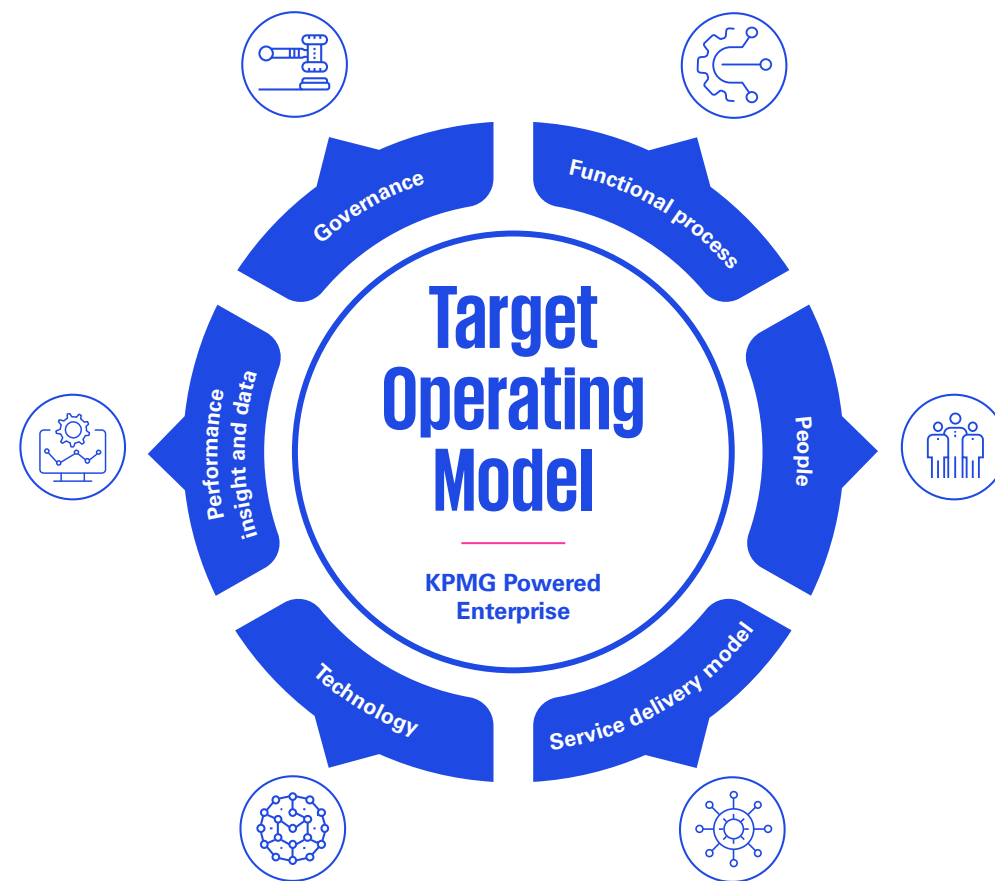

Risks, controls, and security segregation requirements related to processes

Functional process

Backbone of the TOM incorporates leading practices, process taxonomies, process flows, and maturity models

Performance insights and data

Data and analytics to inform decision-making and support business performance

People

The roles, organizational relationships, competencies, and skill requirements needed to execute all process areas

Technology

Describes which technologies support what parts of each process

Service delivery model

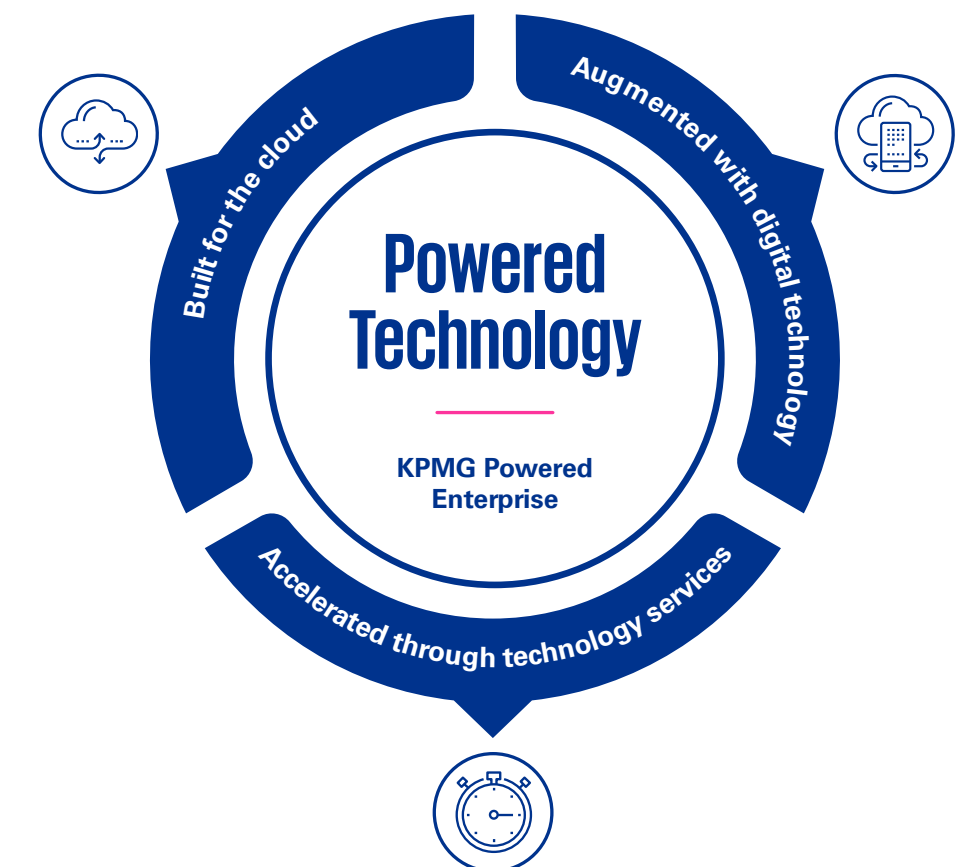

Defines where and by whom processes should be performed

A technology-driven path to finance transformation

Powered Technology helps you realize efficient time-to-value because you start with a prebuilt SAP S/4HANA solution that incorporates our industry-specific best practices in our TOM. From day one, you can tap straight into leading practice and enhance your capability across all finance functions.

KPMG leverages a shared portfolio of digital use cases that demonstrate how to enhance specific process areas. From day one, you can tap straight into leading practice and enhance your capability across:

- Plan to Perform
- Quote to Cash
- Project to Result
- Initiate to Operate
- Source to Pay
- Acquire to Retire
- Transact to Record
- Record to Report
- Treasury

Powered Evolution—designed to help continuously improve your business

A key advantage of Powered Finance is Powered Evolution—an evergreen release cycle that keeps you current with our leading practice regarding the TOM and with the latest updates from your cloud provider. However, it goes beyond technology updates.

Delivering results, collaboratively

Underpinning this methodology is the KPMG Powered Execution Suite, which helps ensure consistent delivery across three key areas: program management, value management, and change management.

Powered Finance is designed to help you:

- 1 Reduce implementation risks and achieve enhanced return on investment
- 2 Harness the power of data and enable your organization to deliver improved value to your business and your customers
- 3 Jump start your digital transformation, with a solid starting point, plus the ability to customize
- 4 Access finance process taxonomies, leading practices, and process flows immediately
- 5 Help your people embrace new ways of working
- 6 Evolve and improve continuously
